**Re: Outstanding Service and Project Completion Recognition**

Dear Emin,

*I would like to recognize you and your team for an outstanding job in creating the custom CRM system for my company. I had asked for some complex customizations which required deep software knowledge of Bitrix24 as well as PHP coding and Java. You and your team understood all my requirement and designed a system that was precisely what we wanted.*

*I wanted to especially thank you and your team for understanding the urgency of this project and working extra hours to meet the timelines.*

*I would confidently recommend you and your team for your expert services in Bitrix24 installation, customization, PHP coding and IT projects.*

Thank you again and I look forward to implementing our future IT projects with you.

Regards,

Sean Shahan Karadjian
